Job Board Messages

Job Board · https://learning.pcrecruiter.net/site/docs/job-board/job-board-messages/

Introduction

Text entered into this area will appear at the top of the Results page above the search form and job list. The only items found in the Insert Fields panel here are the “Submit_Resume_Link” item (inserts a link to register without selecting a job using the ‘Register’ form described above), and the "Update_Information_Link" (inserts a link to update existing info for those who are logged in, using the 'Update' form described above).

Thank You

Text entered into this area will appear at the end of the apply process. The “Insert Fields” button may be used for inserting details from the job or candidate submission. Bear in mind when composing the message that job-related field inserts will be omitted if the candidate is not applying to a specific position.

By default the “Finish” button at the end of the apply process goes back to the initial job search, but an alternate URL may be entered into the box below the HTML editor.
If you need to add any confirmation scripts or conversion tags to the job board, you will be able to do so by using the < > source editing button on this screen.

No Jobs Found

Text entered into this area will appear if no positions are active or if the jobseeker runs a search that returns no results. The only items found in the Insert Fields panel here are the “Submit_Resume_Link” item (inserts a link to register without selecting a job using the ‘Register’ form described above), and the "Update_Information_Link" (inserts a link to update existing info for those who are logged in, using the 'Update' form described above).
